

Environment Day Celebrated at MIER

MIER group of institutions celebrated World Environment Day with great zeal and enthusiasm today. MIER College of Education celebrated the day by organising an exhibition in the college premises. MIER college students prepared models and charts on the theme noise, air and water pollution and conservation of wild life. Dr. Arun K. Gupta Chairman, Dr. Renu Gupta Director, while visiting on this occasion appreciated the work of the students and highlighted the importance of environment in the present scenario. They encouraged the B. Ed students to plant more trees so that a healthy environment can be created and maintained in the coming future. They also appreciated the efforts of the environment committee members Mrs. Shashi Koul, Mrs. Poonam Soni and Mr. Rajender for organising such useful activities. Dr. Surinder Kour Co-MR of the college, Teaching faculty of the College and many senior officers of the administration visited and gathered useful information from the exhibition.

Model Academy, The Prestigious School of MIER both at its Residency Road and B. C. Road branches celebrated this occasion on a grand scale by organising painting competition, waste material craft work, tree plantation drive, Inter house competition on the topic 'Global warming' & 'Save the Environment'. Joint director Dr. Adit Gupta , Principal Mrs. Rupa Gupta and

Project Director Mrs. Ruchika Gupta motivated the students by showing their own involvement in all the activities organized by the both the schools and highlighted the role that students can play in saving the Earth and advised them to plant at least one tree in their home and community. Students were also told to write a paragraph on the significance of trees. The students of Humming Buds both at B. C Road and Residency Road branches also took part in various activities like Nature walk, Community helper programme, watering of plants, tree plantation and preparing Brown Carry Bags. Children were also given important information like how to use resources wisely e. g turning off the lights when not needed, use of dustbins for throwing garbage, turning off tap water when not in use and how to keep air, water, land clean& healthy for everyone.
