

Programme on “Peace is Possible” Organised

A video discourse on “Peace is Possible” was organized at MIER College of Education by Raj Vidya Kender, New Delhi, a non profit organization founded by individuals dedicated to help, promote and disseminate Maharaji’s message of peace and hope. This charitable non profit society is involved in educating the people in the potential of human life, and help people in self discovery bringing about peace, harmony and universal brotherhood. The society organized the programme through YPI (Young People’s Initiative), a volunteer group of spirited dynamic youth of India, committed to contribute their services to all irrespective of their caste, colour and religious belief.

The video clipping was shown to all staff members, B. Ed Students including B. Ed Special Education (MR) and PGDCA Students. The theme was “Peace is Possible”. The search of the peace should start from searching within us rather than looking for outside.

The learned speaker Mr. Prem Rawat emphasized that a sense of direction in life is very important for searching our destination. In order to find our true self we need to look within ourselves.

The staff and the students benefited immensely from the discourse and discovered ways and means to maintain peace and harmony in their lives by following certain directions in real life situations. For that, we have to explore the abilities within ourselves and find our true self. There are tensions and tragedies in our lives but if we have faith that God is within us in good and bad days then only we can enjoy our life and be in peace. A formal vote of thanks was presented by Dr. Ira Bhan.
